Mr. Maher - EPA approves your request to extend the monitoring deadline for Beemsterboer to March 1, 2014. We understand Beemsterboer has been told that there is a 6 week time period between ordering the monitoring equipment and delivery. Please notify us of the date that Beemsterboer ordered the equipment. We look forward to hearing from you once all materials have been removed. If you have any questions or would like to discuss anything in the meantime, please feel free to call me or Nicole Cantello at 312.886.2870.

Bonnie:

Based on our conversation today, which included discussion of equipment ordering difficulties, the recent holidays and extreme weather, I requested an extension until March 1, 2014 of the monitoring recently approved by USEPA at the Beemsterboer facility. As also discussed, we expect the remaining Metcoke will be removed by February 28th. I agreed to contact you, immediately, once the materials are removed.

Thank you for your timely consideration of this request.

Sincerely,

Mike Maher
